Streamlining Business Processes

NetSuite ERP simplifies and integrates core business functions—like accounting, inventory, sales, purchasing, and CRM—into a single system. This eliminates the need for multiple disconnected applications and manual data entry.

Key Benefits:

- **Unified Platform:** All departments operate on one system, reducing silos and improving collaboration.
- **Real-Time Visibility:** Live dashboards and reporting tools provide instant insights into financials, operations, and performance.
- **Automated Workflows:** Routine tasks like approvals, invoicing, and order processing are automated, saving time and reducing errors.

SaaS ERP as a Catalyst for Business Growth

Unified Operations				
Finance, HR, Supply Chain, Sales, Customers and Vendors, Intercompany, Multi Subsidiary, Multi Currency				
Efficiency & Automation	Real-Time Insights	Scalability	Customer Value	Global Reach

NetSuite ERP isn't just a system—it's the backbone of scalable growth. By integrating processes, automating operations, and delivering real-time visibility, it empowers businesses to expand confidently and sustainably.

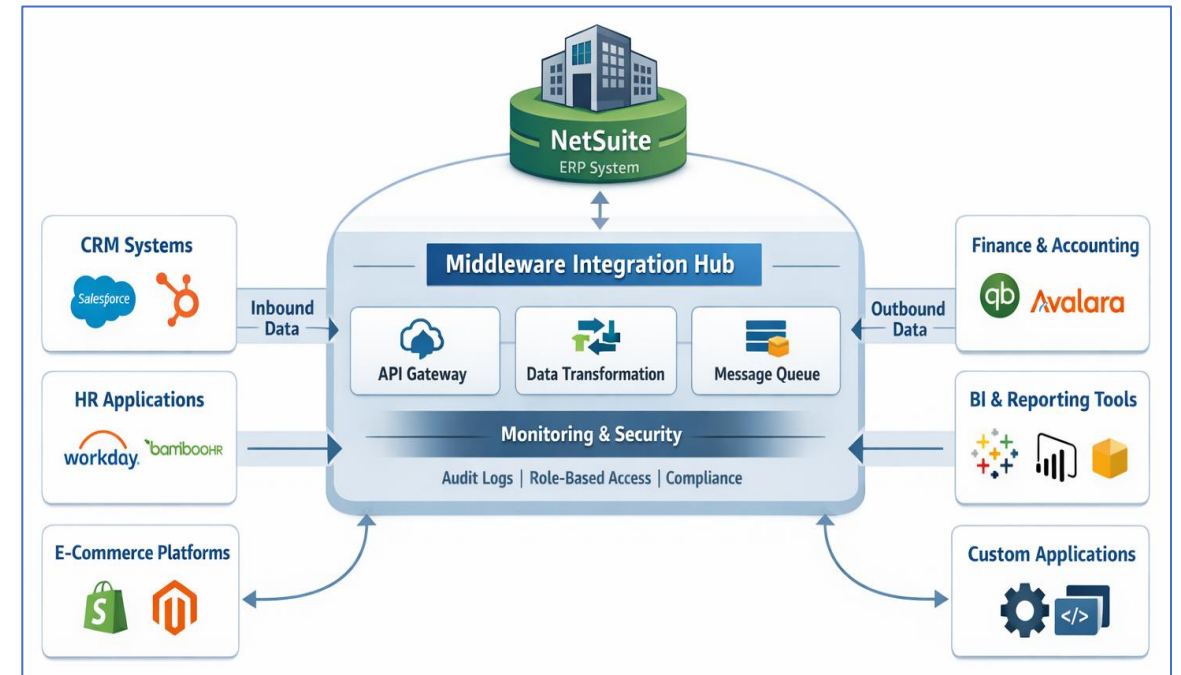

360° Integration

360° Integration refers to the complete unification of business functions—across departments, geographies, and systems—into a single, cloud-based ERP platform. NetSuite ERP enables this by connecting Accounting, Inventory, Sales, Purchasing, CRM, and more, ensuring seamless data flow and synchronized operations.

Key Highlights:

- **End-to-End Visibility:** Real-time dashboards and reports across all business units.
- **Cross-Functional Automation:** Streamlined workflows from lead to cash, procure to pay, and plan to produce.
- **Scalable Architecture:** Supports multi-location, multi-currency, and multi-subsidiary operations.
- **Unified Data Model:** Eliminates silos, enabling consistent decision-making and compliance.

This level of integration empowers leadership teams to make faster, smarter decisions while reducing operational friction.

Key Features

NetSuite Financials

- General Ledger
- Accounts Payables & Receivables
- Tax Nexus

NetSuite OneWorld

- Multi Subsidiary
- Global Chart of Accounts
- Classifications
- Intercompany
- Multi Currencies

NetSuite

Reports & Dashboards

- Financial Reporting
- Operational Reporting
- Dashboard Setup & Configuration

Procurements / Inventory

- Purchase Management
- Invoice Management
- Vendor Management
- Stock Management

Work Order Management

- Work Order Management
- Bill of Material & Work Order Issue
- MFG Routing

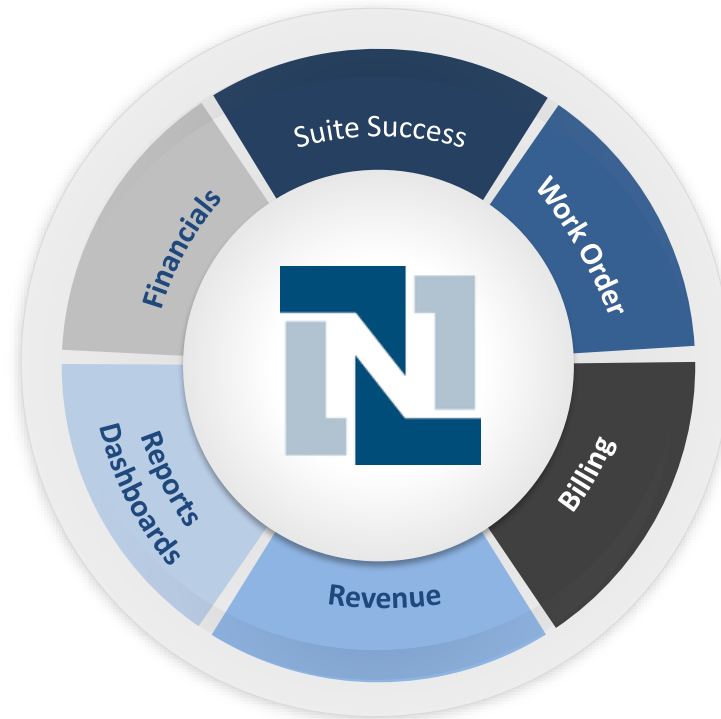

Revenue / Sales (O2C)

- Customer Management
- Lead / Opportunity
- CRM Service Process
- Invoicing and Payments

Project Management

- Resource Management
- Project Accounting
- Project Reporting

Enterprises AI Operating Model

A unified model spanning strategy, execution, and productisation — designed to deliver measurable AI transformation at scale.

AI Strategy

- AI Readiness & Onboarding
- Enterprise AI Roadmap
- Operating Model Transformation
- Governance & Integration Blueprint

Designing the intelligence foundation.

AI Execution Layer

- AI & Workflow Automation
- Document Intelligence
- Agentic AI & AI Copilot
- Enterprise AI Integration

It's a horizontal capability

AI Products

- SmartDoc AI
- Industry-Specific AI Solutions
- AI-Powered Decision Systems
- Domain-Focused Intelligence System

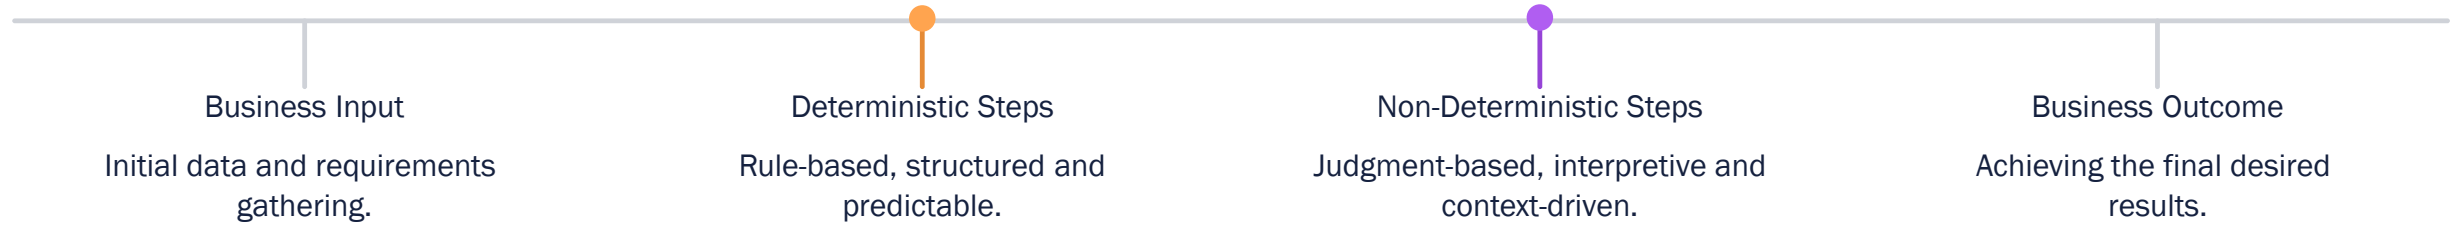

Productizing AI into scalable platforms.

Strategy → Operationalization → Productization → Scale

AI Execution Layer

Embedding Intelligence into Enterprise Workflows

Core AI Capabilities We Operationalize

Language Intelligence

- Summarization & Report Generation
- AI Copilots & Contextual Understanding

Data-Driven Insights

- Predictive Analytics & Trend Analysis
- Actionable Operational Dashboards

Classification & Pattern Recognition

- Document Classification & Routing
- Anomaly Detection & Intent Analysis

Agentic Automation

- Multi-step Process Orchestration
- Cross-system Execution & Human-in-the-Loop

Document Intelligence

- OCR & Structured Data Extraction
- Validation & Compliance Analysis

Workflow & RPA Automation

- Business Process Automation
- Rule-Based Workflow Orchestration

Automating the predictable. Augmenting the complex.
